

SOURABH KIRAN KERAGUTE

Software Engineer | Python & Backend Developer (FastAPI, REST APIs, SQL)

Bengaluru, Karnataka, India | sourabhkeragute@gmail.com | +91 8431127576 | [LinkedIn: sourabh-keragute](https://www.linkedin.com/in/sourabh-keragute) | [GitHub: sourabh1911](https://github.com/sourabh1911)

PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in Python, SQL, Data Structures & Algorithms, and REST API development using FastAPI/Flask. Built and shipped end-to-end Python applications spanning NLP-driven automation, backend API design, and relational database modeling. Comfortable with object-oriented programming, Git/GitHub workflows, Agile/Scrum, debugging, and writing clean, well-documented, production-oriented code. Looking to contribute strong problem-solving skills and full-stack Python experience to a Software Engineering team.

TECHNICAL SKILLS

Languages: Python, SQL, Java (fundamentals)

Data Structures & Algorithms: Strong problem-solving with arrays, trees, graphs & recursion; solid grasp of time/space complexity analysis

Object-Oriented Programming (OOP): Classes & Objects, Inheritance, Polymorphism, Encapsulation, Abstraction, Design Patterns (basics)

Backend & APIs: FastAPI, Flask, REST API Design, CRUD, JSON, HTTP/HTTPS, Client-Server Architecture, Authentication Concepts

Databases: MySQL, PostgreSQL, SQL Server, Normalization, Joins, Indexing, Transactions, Stored Procedures, CTEs

Python Ecosystem & ML: Pandas, NumPy, scikit-learn, NLTK, Streamlit, Matplotlib, Feature Engineering

Tools & Practices: Git, GitHub, SDLC, Agile/Scrum, Unit Testing fundamentals, Debugging, Code Review, Technical Documentation, AWS Cloud Practitioner fundamentals

PROJECTS

IntelliHire — AI-Powered Resume Screening & Shortlisting Platform | *Python, Streamlit, NLTK, scikit-learn, NLP*

- **Problem:** Recruiters manually screening hundreds of resumes against a job description is slow, inconsistent, and hard to scale.
- **Solution:** Built an end-to-end Python application that extracts and validates candidate details from unstructured PDF resumes using rule-based parsing and NLP techniques.
- Designed a multi-factor scoring engine combining TF-IDF cosine similarity, skill-match percentage, and experience scoring to rank candidates objectively against job requirements.
- Added configurable fit-tiering (Strong / Good / Possible / Weak Fit), automated shortlist generation, ranking and funnel visualizations, and one-click CSV export for recruiter handoff.

Task & Expense Management REST API | *Python, FastAPI, PostgreSQL/SQLite, Git*

- **Problem:** Teams needed a lightweight, reliable backend service to create, track, and manage users, tasks, and expenses with proper data validation and persistence.
- **Solution:** Designed and built CRUD REST APIs for users, tasks, and expenses using FastAPI, structuring the codebase with an object-oriented, class-based architecture (models, services, and repository layers) for modularity and maintainability.
- Applied OOP principles — encapsulation and inheritance across model/service classes — to separate business logic from data access and keep the API layer clean and testable.
- Modeled a relational schema with primary/foreign keys, normalization, and indexing fundamentals; wrote SQL queries covering CRUD operations and transaction handling.
- Implemented input validation, structured exception handling, and API testing; managed the codebase with Git following a feature-branch workflow.

EDUCATION

Master of Computer Applications (MCA) — SJB Institute of Technology (SJBIT), Bengaluru 2024 – 2026

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- Data Analytics Job Simulation — Deloitte Australia (Forage)
- Data Structures & Algorithms with Java — DSEdify

ACHIEVEMENTS & LEADERSHIP

- Represented at State-Level Handball, demonstrating teamwork and discipline.
- Inter-Department Coding Challenge — demonstrated strong problem-solving and analytical thinking under time pressure.
- Captain of local cricket tournament teams — led strategic decision-making and performance management under pressure.
